Full Stack Software Developer

Accomplished full stack software developer possessing a combination of technical and leadership skills needed to drive the achievement of key enterprise-wide goals and objectives. Extensive experience in software development using various technology stacks leads to the design and deployment of scalable, user-friendly applications. Additionally, project management expertise allows for effective leadership of cross-functional teams and complex projects. An eye for design and love of CSS contributes to the creation of engaging user interfaces that push the boundaries of functionality and aesthetics. Able to use strong communication skills and in-depth subject knowledge to explain complex ideas in an easy-to-understand manner, leading to long-term relationships with employees and stakeholders alike.

AREAS OF EXPERTISE

HTML5 | CSS | Javascript | React | Nodejs | MongoDB | Mongoose | Python | Flask | Java | MySQL | Spring/Boot | Bootstrap | Tailwind | AWS | Figma | Wordpress

---

TECHNICAL PROJECTS

THE BALLOT BOX   http://100.26.160.109/
React.js | Tailwind | MongoDB
CRUD online voting platform built with MERN stack. Logged in users can create, edit, and delete candidates. Passwords are hashed with Bcrypt. Utilizes promises, event/error handling, and RESTful APIs. Deployed with AWS.

BEEN THERE, RUN THAT   http://100.25.77.155/
Java| Spring | MySQL
Online running community with full CRUD capabilities. Logged in users can create, edit, and delete their runs and also connect with other runners by cheering for them or requesting mile dedications. Runners can also upload photos from their runs. Passwords are hashed with Bcrypt. Deployed with AWS.
